General Regulations	- Must be a domestic lawn mower from a recognised manufacturer. - Remove all cutting decks and blades. - Altered Gear ratios permitted. - Display race number on the front and side of the mower. Numbers issued on the day. All drivers must be over 18
Definition	A Lawnmower is a garden ride-on, wheel-driven machine, with a chassis designed for an engine up to 16hp, designed to cut grass for domestic purposes.
Chassis and Bodywork	Retain 90% of the original chassis and mower parts; discreet strengthening allowed. - Fit mud flaps where possible - Ensure no sharp edges or spikes; all levers must be ball-ended. - All bonnets must be secured and fixed. - The actual seat may be modified or changed, but the backrest may not be higher than the driver's shoulder blades.
Engine	Maximum 16hp engine (Must be a mower engine) - Modification of exhaust pipes are allowed (no straight pipes) - Fuel tanks must be designed specifically as a fuel tank and must be no more than 4.5 litres in capacity. - Secure fuel tank, out of impact zones and ensure there is a fuel tap
Drive	The original type of drive (belts, chains, gears) must be retained. Pulleys, gears, etc., may be changed to alter ratios. - A gearbox may only be used if originally fitted, and it must be standard and to the original specification. - A mower steering wheel must be used.
Safety Rules	An ignition cut-out must be fitted, which works under any circumstances if the driver loses contact with the mower. Must wear helmet and gloves while racing - Bring a fire extinguisher - No sharp edges or protrusions. - An efficient braking system must be fitted and operational at all times.

This event is all about grassroots mower racing — keeping it fun, friendly, and giving everyone a fair chance to have a go. We're encouraging builds that stick close to standard ride-on mower proportions, so the racing stays safe, even, and enjoyable for all.
